**Technical Literature & Product Specification of  
Sulphited Fish oil (SFO)**

**PRODUCT- SULPHITED FISH OIL (SFO)**

SI.No	PARAMETERS	SPECIFICATION
01	Physical Appearance	Dark Brown clear viscous liquid
02	pH(10% water soln)	7.0 to 8.0
03	Charge	Anionic
04	SO <sub>3</sub>	2.5% min
05	Stability	Stable to Hard water up to 3000ppm

Sulphited Fish oil is made from Cold filtered de-odorized fish oil. Sulphited fish oil plays very important role in leather tanning process. It is used to lubricate animal hides to make It soft. It can be used alone or with other anionic fatliquors in the fatliquoring process. Due to its good compatibility with other synthetic or vegetable fatliquors, it can be used for making various type of fatliquors based on customer requirement. When it is used in combination with synthetic fatliquors, it acts as a replacement for natural sperm oil fatliquors.
