

PURROTAN - MM

RESIN-TANNING AGENT BASED ON MELAMINE

Product Name	: PURROTAN - MM Melamine and aliphatic nitrogen compounds.
Appearance	: White Powder
Solid Content	: 95%±1
pH of 10% solution	: 8.0 – 8.5
Light fastness	: Excellent

Properties :

PURROTAN - MM is a soft resin in powder form recommended to obtain fullness and evenness of round filling during retanning process of chrome tanned leather. **PURROTAN - MM** has very good penetration effect and gives an excellent fullness especially in the loose part of the skin. **PURROTAN - MM** has very good buffability and does not bleach the colour. So, it is very much suitable for the production of suede and Nubuck leather. Applications: **PURROTAN - MM** can be used in all stages for the production of any articles (e.g., uppers, garment, lining etc)

Safety :

A non-hazardous product can be handled with normal care. Any contact with eyes and / or spillage on skin should be washed thoroughly in running water.

Storage :

12 months when stored free from moisture in a dry, cool place in closed containers at ambient temperature.

APPLICATION :

% based on shaved weight
