

TECHNICAL DATA SHEET

PUROTAN –TP **TARA –Vegetable Tanning Agent**

Product name	: PUROTAN TP
Appearance	: Light brown Powder
Moisture Content	: 96.00-98.00%
pH of 10% aqueous solution	: 4.00-5.00
Light fastness	: Excellent

PROPERTIES :

PUROTAN TP is free from colouring substances and consequently it permits to obtain very bright and light fast leathers. Due to its high tanning powder, **PUROTAN TP** is very particularly suitable as a tanning agent in the production of chrome free leathers.

PUROTAN TP imparts good fullness and soft handle, maintaining a fine and tight grain. The strength of the leather is improved when treated with **PUROTAN TP** than that is obtained with any other vegetable tannin.

PUROTAN TP in combination with other vegetable tannins improves the light fastness of the latter with a uniform and clear colour. **PUROTAN TP** used in retanning of chrome – tanned leather gives uniform and pastel shades.

PUROTAN TP has natural acidity, which allows a good fixation of tannins. **PUROTAN TP** can be used in the traditional vegetable tanning either in the last pit or during bleaching and retanning.

SAFETY :

A non hazard product can be handled with normal care. Any contact with eyes and/or spillage on skin should be washed thoroughly in running water.

STORAGE :

6 months shelf life when stored in doors in sealed containers. Protect from moisture and exposure to sunlight.

TECHNICAL DATA SHEET

APPLICATION :

Chrome free leather	: 6.0-10.0 %
Nubuck-Suede	: 3.0-4.0 %
Upper leather	: 2.0-6.0 %
Upholstery leather	: 2.0-4.0 %
Prevention of chrome VI	: 2.0-3.0 %
