

TECHNICAL DATA SHEET

PUOPERSE-DI **DISPERSING AGENT**

Product Name : **PUOPERSE DI**
Appearance : Transparent Liquid.
Concentration : 30 ±1%
pH of 10% solution : 7.0– 7.5
Ionic Character : Anionic

PROPERTIES :

PUOPERSE DI has excellent wetting ,dispersing and emulsifying properties.

PUOPERSE DI imparts outstanding degreasing and enhances the cleanliness of the hides. In combination with non-ionic surfactants it has a positive, synergistic effect.

PUOPERSE DI improves the emulsion persistence thus prevents the fat from settling on the surface of the processing vessel and the hides. **PUOPERSE DI** improves the cleanness of pelts is used in the liming process. **PUOPERSE DI** has a positive and synergistic effect on degreasing in combination with enzymatic soaking agent.

PUOPERSE DI is biodegradable.

SHELF LIFE :

Can be stored for about 6 months if kept between 10°C and 35°C.

In any case, protect from frost and heat above 40°C.

Wore goggles and gloves during handling and close containers tightly after use.

TECHNICAL DATA SHEET

PUOPERSE DI

APPLICATION:

The required dosage for **PUOPERSE-DI** depends on the raw stock, treatment step and preservation type of the pelt as well as on the type of leather to be produced.

Soaking

0.1-0.6% based on salted weight

Liming

0.3-0.6% based on salted weight
