Description :

PUROCRYL-CB-16 is a medium soft elastic low tack acrylic compact binder best suitable for all the types of full grain and corrected grain leather. It imparts the following unique characteristics.

- It imparts smooth touch & tight break with high bondage.
- Low tack with good impossibility.
- It can be applied by padding, spraying or roller coating.
- It is specially suited for finishing splits and also grain leather, both buffed and full grain
- It is light fast hence suitable for white and pastel shades.

Addition of 50 -100parts in season coat result in up gradation of leather.
