

TECHNICAL DATA SHEET

PUROCRYL –S-14 **SOFT SPECIAL BINDER**

Chemical nature	: Aqueous polyelectrolyte soft dispersion.
Appearance	: Translucent pale yellow solution.
Solids	: 15 – 17%
pH value	: 7.5 – 8.5
Charge	: Anionic
Film Hardness	: Sof

Product Properties:

PUROCRYL S-14 is a transparent solution of an acrylic polymer containing water miscible solvents with very fine particle size. It is suitable for grain impregnation for garments and shoe upper leathers. It is useful in finishing of full grain soft nappa and grain sealing of absorbent leathers.
